This manual collects a set of procedures we have found productive in organizing research projects. They are designed to be general enough to be used by the core team in our lab, by teams in other labs we collaborate with, and by outside researchers.

The document *Code and Data for the Social Sciences: A Practitioner's Guide* provides an overview of the underlying ideas and principles on which our approach is based. We recommend that everyone read it before reading the rest of this RA manual. We expect RAs to read it carefully and apply it faithfully.

RA Manual

- Introduction
- Setup
- Issues
- Workflow
- Code
- Data
- Papers & Slides
- Production
- Releases

Appendices

- Practice Task
- Autofilling Values
- IT Support
- Research Clusters
- Legacy Tools

- Style Guides
  - Papers
  - Python
  - R
  - Stata
  - C
- Mothballing Projects
- PhD Applications
- Gentzkow-Shapiro Lab Notes
  - Lab Admin
  - Dropbox
- Allcott-Gentzkow Lab Notes
  - Meeting Notes
- JMSLab Notes
